

Product End of Life Instructions

Compact Smart Relay Zelio Logic SR2 SR3, 20 IO, 24V DC - no clock

Zelio Logic Compact and modular smart relays

Potential disassembly risks

The information provided in this document assumes that the product is completely de-energized and uninstalled (refer to the instructions provided in the appropriate product manuals).

Dismantling/disassembling the product may entail hazards caused by, for example, sharp edges, chemical aggression or ejected parts.

⚠ WARNING

HAZARD DUE TO INSUFFICIENT PROTECTION

- Implement all safety measures required by the applicable regulations and by the processes used to dismantle/disassemble and dispose of the product.
- Use all necessary personal protective equipment such as gloves and goggles.

Failure to follow these instructions can result in death or serious injury.

End of Life Instructions

Recommendation	Number on drawing	Component / Material	Weight (in g)	Comment
To be depolluted	1	Electronic Board (Power) > 10cm²	166	PCBA
To be depolluted	2	LCD Screen	33,5	
Other			94,5	Except for above part

Product description

Manufacturer identification	Schneider Electric Industries SAS
Brand name	Schneider Electric
Product function	The compact smart relay provides a real alternative to solutions based on cabled logic or specific cards. It comes with display and without clock. Checks program memory on each power up and 0 to 240 with ladder programming number or control scheme lines.
Product reference	SR2A201BD
Total representative product mass	294 g
Representative product dimensions	90 mm x 71.2 mm x 59.5 mm
Date of information release	06-2026

Additional information

Legal information	The product family must be disposed according to the legislation of the country. This document is intended for use by end of life recyclers or treatment facilities. It provides the basic information to assure an appropriate end of life treatment for the components and materials of the product.
Recyclability potential	10% The recyclability rate was calculated from the recycling rates of each material making up the product based on REEECY'LAB tool developed by Ecosystem, for components/materials not covered by the tool, data from the EIME database and the related PSR was taken. If no data was found a conservative assumption was used (0% recyclability).
